What works for each game

You can build binders for every game below. This table shows which search, page fill and scanning features are fully live for each game, and which are still being filled in.

Game	Card search find any card	Colour fill match by colour	Similar fill cards that look alike	Theme search search by what's in the art	Card scanner identify from a photo

WHAT THE LABELS MEAN

Live

Works for at least 70% of the game's released cards.

WIP

Works today for the cards it covers, and more cards are added as we go.

WHY SOME ARE WIP

Magic and Yu-Gi-Oh! have tens of thousands of printings, so their cards are added in batches. The scanner and similar fill learn each game's cards first, and theme search needs every card's art described before it goes live.
